Special November CAG Planning Meeting

WHEN: Tuesday, November 19, 2019, 5:30 - 7:30PM

WHERE: Focus Points Family Resource Center

2501 48th Ave., 80216

---

Kim Morse, CAG Administrator

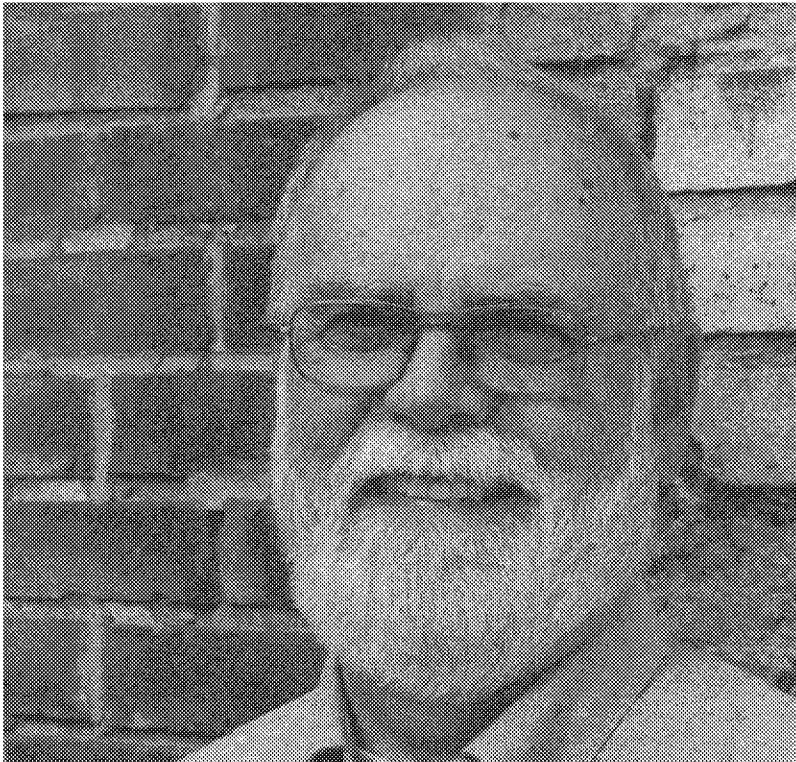

---

**Outline for a revised Remedial Investigation for Operating Unit 2  
of the Vasquez Boulevard/Interstate 70 [VB/I-70] Superfund Site,**

**1894-1919.**

(Future installments will take us up to the present.)

By CAG volunteer technical expert, Chuck Norris

"The following outline is structured from a consideration of geology/hydrogeology/chemistry and geochemistry of the VB/I-70 Site's Operable Unit 2 [OU2] as they pertain to a revised Remedial Investigation [RI]. Perhaps ironically, there is, according to USEPA Region 8 as of the September meeting of the CAG, no definition of VB/I-70 OU2 with respect to geographic extent, spatial distribution within such extent, or contaminants that will be considered. Related, the Agency stated that there was not, a month ago, an

accepted conceptual model of source, fate, and transport for OU2. These will be developed by the implementation of the RI."

## Melissa's Story / Health Issues

*Her family lived in the VB/I-70 Superfund Site*

My name is Melissa, I am 25 years old. When I was born, right away, the doctors knew that something wasn't right. I was not breathing or moving. It took the doctors several minutes to revive me. As I grew, my family began to notice that I was not growing the way I should, and that my eyes were shaking uncontrollably, as well as not focusing or tracking the way they should be. I was sent to an ophthalmologist who diagnosed me with Optic Nerve Hypoplasia.
